

RER120-26/14/2TDP (Feed Equipment Box Vent Fan)

	Colour	Operation
Wire 1	red	+ UB +24V
Wire 2	blue	- GND
Wire 3	violet	PWM input
Wire 4	white	Tacho output

All voltages measured to ground.
External load resistor R_a / U_S / U_{BS} required.

$I_{\text{sink}} = 2\text{mA}$

Speed control range from 800 rpm at 7 % PWM up to nominal speed (RPM 6100) at > 90 % PWM.
Standstill at 0 % PWM, **nominal speed if PWM floating!**
